-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I (claims 1-3 and 6-8) in the reply filed on November 22, 2004 is acknowledged. Claims 1-3 and 6-8 are pending and will be considered for examination. All other claims are hereby withdrawn from consideration.

### ***Drawings***

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). This figure shows nothing more than client-server system which is old and well known in the art.

Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3625

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

This claim recites a program (i.e. article of manufacture) in the preamble, but the body of the claim is directed to a computer (i.e. system or apparatus). It is unclear to the examiner how the preamble relates to the body of the claim because the preamble and the body are directed to two different statutory classes of inventions.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-3 and 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Kemp (US 2001/0047251 A1).**

Referring to claims 1-3 and 6-8, Kemp teaches a parts retrieving system including a server and a user terminal capable of communicating with each other through a network (paragraph [0034]), said server comprising: a product-parts data base having complete data of products and parts recorded so as to be retrieved

Art Unit: 3625

including picture data of said products and said parts (paragraph [0146]); retrieve means for retrieving from said product-parts data base, product picture data responding to product specifying information transmitted from said user terminal for specifying a product relating to parts to be retrieved (paragraphs [0141] and [0142]), parts group picture data responding to parts group indicating information transmitted from said user terminal for indicating a required parts group, and parts data responding to parts indicating information transmitted from said user terminal for indicating parts to be retrieved (paragraphs [0140]-[0142]); and server side transmission means for transmitting said product picture data, said parts group picture data and said parts data retrieved by said retrieve means to said user terminal, said user terminal comprising: display means for displaying said product picture data said parts group picture data and said parts data transmitter from said server side transmission means on a display surface; and user side transmission means for transmitting said product specifying information, said parts group indicating information and said parts indicating information to said server (Figure 3, paragraphs [0088] and [0145]-[0147]).
